Easy Ray Health Program

All of our bulls are on the Pfizer Gold Herd Health Program. The bulls have had all the shots twice, once at branding & then again at weaning. We also use Ivomec & Saber for Lice

Easy Ray Feeding Program

Our bulls are fed corn silage, along with hay & straw mixed together along with receiving 1 kg of corn distillers & 1kg of barley and they have done exceptionally well for us.

BMB BREWIN ANGUS

Welcome everyone to our 16th year as a guest consignor with Easy Ray Angus. Once again we are happy to work with Easy Ray Angus to present this year's set of functional bulls that are ready to work for you the customer. As we continue to improve our genetics and quality, we feel this year's bull offering is topping the years before. The bulls will be semen tested & vet checked prior to the sale. We also have on offer a strong group of approximately 65 quality red angus commercial open replacement heifers. Majority of this group of heifers come from our purebred herd. The heifers will be palpated prior to the sale. We would like to invite & encourage past & future buyers to come to the farm to look at the bulls & heifers that we have on offer prior to sale day. With much gratitude & appreciation, we would like to thank our past customers, Perlich Bros Auction & fellow producers for their continued support over the years. We look forward to seeing you sale day & if you are unable to make it due to the weather conditions or cows having untimely calving issues, rest assured we will be broadcasting on DLMS. Please feel free to contact us with any questions you may have. We will also be having Mark Holowaychuk & Roger Peters from OBI as buyer representatives.

Brent, Myrna, Devin & Janessa

BMB Brewin Angus utilizes a complete herd health program emphasizing the health and performance of their livestock. The breeding herd receives yearly preventative 8-way clostridial, 5-way viral and scour pathogen vaccination concentrating on the health of the cow-calf herd. At birth, calves receive intranasal pneumonia immunizations and a preventative coccidiosis treatment. At spring turnout and weaning, calves are vaccinated with a 5-way viral Mannheimia Haemolytica along with a 7-way clostridial with Histophilus Somni. A mineral package is available free choice as well as built into a TMR over the winter, helping to keep the herd in peak performance. Replacement heifers are pre-breeding palpated to ensure they check all the boxes before entering a new herd. Buyers can be confident purchasing a new herd bull or package of replacement heifers from the knowledgeable and attentive breeders at BMB Brewin Angus.
