## **BIRTH WEIGHT AND CALVING EASE**

University studies in Wyoming and data from Montana & Colorado lend credence to the following conclusions.

1. The birth weight itself influences calving ease by 65%
2. The female has 60-70% influence on birth weight of her calf
3. The bull has 30-40% influence on birth weight of his progeny
4. Pelvic measurement and angle as well as the shape of the calf has 35-40% influence on calving ease
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation
6. Weather and temperature the last 30 days affect the length of gestation
7. Size and maturity of the cow influences calving ease

Remember, everything is relative. Increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have the genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lbs at birth to finish at 1200-1250 lbs. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus a 1200 lb cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

## OBI Livestock Welcome 2025

I would like to Welcome you all to the 2nd Annual Bull Sale for BMB Brewin Angus & Gurney Land & Cattle. These 2 seedstock producers in southern Alberta both have great families and so easy to deal with and that is great to see as a customer of theirs. At both operations, these are the best set of bulls they have offered.

BMB Brewin Angus have developed bulls for the area with obtaining top end walking herd bulls over the years along with continuing to use A.I. bulls to develop their herd. The cow herd is large with many females lasting a long time at the ranch. Longevity is key in this operation. In the bull pen this year we have a variety for your pleasures, with a lot of calving ease bulls while still having the power bulls for the cow herd. These bulls are fed to last long for the new owners, and their customer satisfaction is guaranteed.

Gurney Land & Livestock will continue to carry on their success from previous bull sales. Bulls are also fed for longevity and no issues in the long run. They go out and work hard for their new owners. Large sire groups enable you to see what that A.I. bull or walking bull did for them. They also have started a Red Angus program to service their customers. The bulls are in great shape with a good foot under them. Strong culling process will be seen by all with the quality in this bull pen.

Buy with confidence from either of these programs as these bulls go out to work with hardly any issues. I am very familiar with these bulls, so please do not hesitate to call me, the consignors or the sale staff on the offering. See you at Lethbridge

Mark Holowaychuk  
OBI

# BMB BREWIN ANGUS

We wish to extend a warm welcome to our 2nd annual bull sale. As I write these notes we are into the full swing of calving. Pictures and videos are done (albeit the videos are done early, but have to fit them in when we can) & catalog is almost complete. We believe our bulls will not disappoint this year. Our goal is to raise bulls that will go out and work for you. This year we will once again have a strong group of replacement heifers on offer (majority from our purebred herd sold as commercial). We are beyond humbled with recently winning the Grand Champion Purebred Heifer pen of 3 at the Medicine Hat Pen Show back in December. Janessa likes to keep rubbing it in to Brent that her pick was the best choice of uniformity for the group of heifers and his alternative choice of heifer was wrong for the group.

Again we would like to invite and encourage past & future buyers to come to the farm prior to sale day to evaluate the bulls & heifers on offer. With much gratitude & appreciation we would like to thank our past customers, Perlich Bros. Auction, fellow producers and family & friends for their continued support over the years. We always look forward to seeing you on sale day.

**Brent, Myrna, Devin & Janessa**

**TELUS Cattle  
Professional Services**  
BROOKS·LETHBRIDGE·OKOTOKS·TABER

I have had the pleasure of working with the Brewin family for the past six years and have enjoyed watching the compassion, care, and progression of their operation. BMB Brewin Angus utilizes a comprehensive herd health program that emphasizes the health and performance of their livestock. The breeding herd receives annual preventative 8-way clostridial, 5-way viral, and scour pathogen vaccinations to protect the cow-calf herd. At birth, calves receive an intranasal pneumonia immunization, vitamins, and a preventative coccidiosis treatment. During spring turnout and weaning, calves are vaccinated with a 5-way viral vaccine including *Mannheimia haemolytica*, as well as a 7-way clostridial vaccine with *Histophilus Somni*. Additionally, a mineral package is provided free choice and is integrated into the TMR to maintain peak performance. To ensure they meet all necessary criteria before entering a new herd, replacement heifers undergo pre-breeding palpation. Buyers can be confident when purchasing a new herd bull or a package of replacement heifers from the knowledgeable and attentive breeders at BMB Brewin Angus.

Best regards,

**Cory Davis, DVM**

Weaning rate ratio of 101. Lots of style and natural thickness on a good foot. Smooth fronted with great skull structure. His sire was an in purchase from Kenray Ranch at Red Round-up. We have been pleased with his offspring. Paternal Sibling Lot 12.

We are very happy to welcome you to our 14th annual bull sale! What an exciting time to be in the cattle business. Cattlemen are getting paid for their hard work and time spent raising a product the world needs! Our vision and goals remain the same. To produce sound, functional cattle that will be an asset to your herd's productivity and success. We focus on maternal, growth, and carcass qualities with a desire to improve foot and leg structure. Docility and calving ease are also a high priority for our family's safety and yours. We feel this year's set of bulls has really raised the bar for quality and soundness. We have strived to source A.I. Bulls and walking herd sires that will improve the cow herd, whether it be foot quality and leg structure, udder structure, or maternal ability. And of course, performance. Either weaning and yearling weights or carcass and finishing weights.

New this year, we are selling a group of replacement heifers right from our Purebred herd. They will be selling as commercials. They come from the same sire groups as the bulls in this year's offering. We feel they would be a great addition to anyone's herd. They'd be in my herd if we only had more grass for them.

We are very thankful to our customers, neighbours, and friends for your trust and confidence in our program. We strive to earn and keep your business by providing the very best bulls possible and customer service to match. We look forward to seeing you on sale day and invite you to come anytime prior to the sale to view the bulls and their dams at the farm.

## **Herd Health Management**

We strive to provide our herd with the best possible feed ingredients and health protocols to ensure optimal health and growth throughout their lives. At birth, the calves are given Inforce 3 and Vit ADE and weighed within 24 hours of birth. Before we turn out in early June, the calves are given Pyramid FPS with Presponse, Fermicon 7/Somnugen, and Longe Range and DNA samples are taken to parent verify the calves to their parents. During the summer months, the calves only have grass and mother's milk with a mineral/Vitamin tubs to lick. We don't creep feed our calves. We feel this is the best way to evaluate the actual growth and potential genetics of these calves and their dams. This year the bull calves were weaned on October 1st 2025. We give them booster shots of Pyramid FPS and Fermicon, as well as Ivermectin or Cylence, pour on. At this time weaning weights are taken. We feed alfalfa silage to our herd and start the bulls on an alfalfa silage/Timothy ration to begin. We then introduce a pellet ration from Bullseye Feeds into the ration. We slowly increase the pellet ration to 1% of the body weight of the animal and eliminate Timothy from the ration. We feel this ration helps the bulls to grow into their genetic potential, without pushing them too hard and burning them out which would reduce their long-term breeding potential. All bulls are semen tested by the wonderful staff at Fort Macleod Vet Clinic a few weeks before sale day. At this time the bulls are given their first shot of Fusoguard for prevention of foot rot. The booster shot is given right before sale day.

## Notes:

# **TERMS & CONDITIONS**

**TERMS:** The terms of the sale are cash or cheque payable in Canadian funds. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale. The right of property shall not pass until after the settlement has been made. Each animal will be sold to the highest bidder. All disputes will be settled by the auctioneer & their decision will be final.

**DELIVERY:** We will deliver your bulls free of charge within 200 km, extra mileage will be at cost. Delivery will be as close to the date you request, but will be at our convenience. If you cannot take your bull when we are in the area, we would appreciate if you made arrangements to pick up your bull.

**LIABILITIES:** Although every precaution will be taken to protect the safety and comfort of the buyer, neither the sale staff nor the owners assume any responsibility in this manner and disclaim any liability, legal or otherwise in the event of an accident or loss of property.

**INSURANCE:** Each animal becomes the risk of the purchaser as soon as it's sold therefore we recommend you insure your purchases.

**ANNOUNCEMENTS:** Any changes from the catalog will be announced from the auction block. Such changes will take precedence over the printed matter in the catalog and therefore buyers are cautioned to pay close attention to any such announcements.

**BREEDERS GUARANTEE:** All bulls sell under the terms and condition outlined in the CAA bylaws. All bulls will be semen tested and have a breeding soundness evaluation performed by a licensed veterinarian prior to the sale.

**WINTERING OF BULLS:** We will winter your yearling bulls free of charge until April 15th, after that feed costs of \$3/hd/day will be charged. Any bulls returning to the consignors will be at buyers risk, the consignors will not be responsible for any type of injury while the bulls are in their care. Any bulls returning home must be insured giving both parties peace of mind.

**CERTIFICATE OF REGISTRY:** A certificate of registry will be mailed to the buyer once settlement is made in full.

**RETAINED INTEREST:** Seller reserves the right to collect "Owner's Use" semen from any bull in this sale (at the seller's expense and at the buyer's convenience)
