Pincher Creek, AB T0K 1W0

**[www.yarrowcreekranch.com](http://www.yarrowcreekranch.com)**

We wish to extend our warmest welcome to our friends, neighbors and fellow cattlemen and cattlemen and cattlemen to join us for our 18th annual bull sale at Perlich Bros. Auction. We are proud to provide this group of bulls to you. Dennis and I also welcome you to visit the ranch anytime prior to the sale day to evaluate the bull offering and the cowherd that produced it, to study in detail, to select for your program.

The future of our business looks promising. Fall 2023 brought the highest feeder calf prices, it was rewarding to see our customers reap good returns on their genetic investments they've made over the years. We feel a strong maternal factory at our level is where the beef industry starts. Dennis began YCR in 1997 – 27 years ago. He has focused on the maternal consistency in selecting for the herd. We emphasize good foot traits, udder quality, fertility and a weaned large calf every year without a lot of extra care.

We are lucky and have made it through another dry moisture year and remain optimistic on the hay and pasture season coming up. To date, Jan 29th, bull picture day, we have had an exceptional good calving season, 2/3 complete with healthy calves and good moms. A little 40 below, a little 15 above. Lots of night checks, mud and straw shredded. The bulls were weaned August 15th due to drought. They were never pushed and are grown out to be fertile & problem free. Our entire herd has been Parent Verified since 2008, we are one of the few herds in Canada that have DNA proven breed purity.

We truly appreciate your consideration for your next bull purchase. We value you as a customer and a friend, new & old. If you are unable to make the sale, don't hesitate to call, we will be honest and forthright in sharing our evaluation to help you with your decision. We are passionate about making seed stock cattle.

Come early sale day to view the bulls. Coffee and donuts will be served at 10:30AM, Honkers in house restaurant will serve a lunch at 12 noon.  
**The sale to follow at 1:30PM**

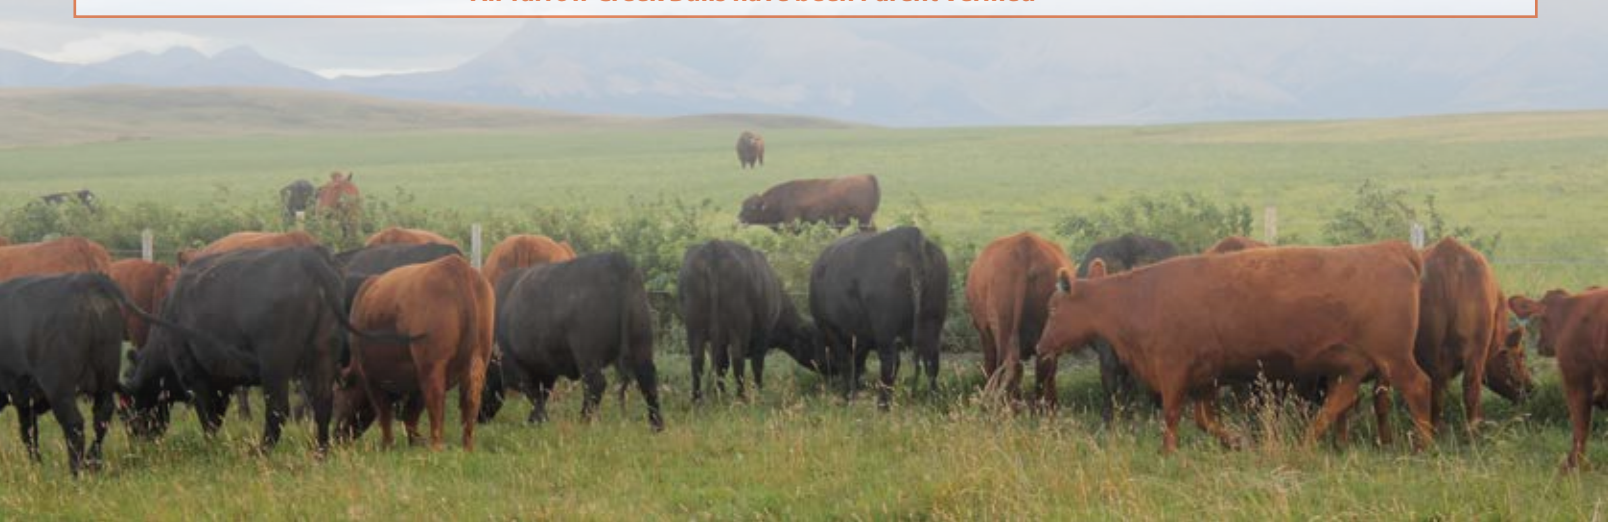

### HERD HEALTH MANAGEMENT

We provide the best care possible to our herd working closely with the Fort Macleod Vet Clinic; Dr. Todd Baker, Dr. Claudia Schlueter, and Alycia Webster; can't ask for better service. We follow a strict vaccination protocol. Our calves are given MuSE and Vit ADE and Enforce at birth. Replacement heifers receive their 1st shot of Pyramid FP5 VL5 Booster in February prior to breeding. In June at tattoo time our calves are given Long-Range, Pyramid FP5 with Presponse, Fermicon 7/Somnugen and DNA Tissue samples are taken also. All our cows at this time also receive Cylence along with the Herd Sires. At preg check time in August; our cows receive a Tasvax-8 way and Express FP5-VL5. Calves all receive Pyramid FP5 with Presponse (booster) and a 8-way. We also use Quiet Wean's at this time and remove them in 7 days at weaning time. All our cows are vaccinated for scours and are also given Boss pour on for lice.

We believe it's important for our customers be informed of our strict herd management. All bulls will have received Fusaguard 1st shot and booster prior to sale day. We have also used Boss Feeds (Cattle Active) lick tubs in the spring during calving and have seen a real difference in health of our calves and cows at this stressful time.

Bulls are started on Bullseye pellets at weaning and gradually stepped up over time as they grow. At all times our bulls have access to Free choice hay and we really see a difference on how our bulls maintain condition after they leave our place and are working at your ranch.

**All Yarrow Creek Bulls have been Parent Verified**

## POST SALE BULL DEVELOPMENT:

We will winter your yearling bulls FREE OF CHARGE until APRIL 1, 2024. After that, feed cost of \$3.00 per head per day will be charged. All bulls returning to the consignors' must be insured. All bulls will be housed at buyers risk, the consignors will not be responsible for any type of injury while the bulls are in their care.

## INSURANCE:

**Stockmens Insurance :**  
**Cheryl Brown – 403-601-3460**

## DELIVERY:

We offer FREE DELIVERY within 200 km. of home; extra mileage will be at cost. Take your bull home sale day and you will get \$100 off the purchase price.

## ANNOUNCEMENTS

Announcements sale day take precedence over the printed material.

## INDIVIDUAL BULL DATA

Weights, scrotal measurements and semen test  
 Sheets will be available sale day.

## REMINDER TO BUYERS

- All bulls will had there 2nd shot of Fusaguard for prevention of foot rot
- All current weights will be posted sale day
- All bulls will be semen tested prior to sale day
- No bulls have been sold prior to this bull sale
- Bulls taken home sale day; buyers will get \$100 off per bull.

## CALVING EASE

<b>1 star</b> ★	means a bull is recommended to be used on cows
<b>2 stars</b> ★ ★	means the bull should be used on cows or larger type heifers
<b>3 stars</b> ★ ★ ★	means there should be few problems when using these bulls on first calf heifers.
Remember to take into account your own cow herd management, genetics, environment, feeding conditions, etc. They will have a BIG influence on your birth weights.

High selling bull from 2019 Wilbar Cattle Co for \$21,000. Sons have sold and with great impressions. Our goal to provide heifer bulls is to provide consistent calving easy herd sires for our customers. With 124 progeny across all herds in Canada Male calves avg 80 lbs and female calves avg 74 lbs AND the WW index on calves is 101. Crackerjack is in the **top 20% CE, top 1% BW, top 40% WW, and top 55% YW, Milk top 1%** an, sound and full of hair; we have calved out the 3rd year of Crackerjack females and they all have beautiful udders, good feminine mama cows and that's all we can ask for. Crackerjack is a true - smooth fronted, clean sheath, big hipped dark red angus MACHINE.

RED SHILOH YOU R WOMAN 22Y

We purchased 9H from Alisha Minchou at Shiloh Cattle. The gavel went down and we had the high selling bull in 2021 at \$15,000. We admired Heavily Armed standing on an awesome foot and performance phenotype. Heavily Armed with his unbelievable personality and true breeding performer has become a true standout Herd sire at Yarrow Creek. We now have females from Heavily Armed calved out and we are very happy with these udders and foot structure. Heavily Armed is a true performance sire with all the calves WW index 105 and YW index of 109. Unfortunately, we had to put HA down due to an injury.

## RED SIX MILE MOSSY OAK 175H

RED SIX MILE TAURUS 519A  
RED SIX MILE MISS LARK 380X

We went looking for a new AI sire to use on our heifers and 2 yr olds and after seeing progeny we knew we had to use Mossy Oak. Truly admired his sire John Wick and all of his progeny and being a Reckoning son we knew the consistency was there. Mossy Oak is also a outcross pedigree for us with Reckoning and Rust in the pedigree. The really neat thing about Mossy Oak is he not only a calving ease specialist but he is in the **TOP 1% for WW and TOP 1% for YW**. He calved like a dream with exceptional consistency and the calves up and took off and were the best looking calves in the pen. We are very happy with the progeny we have for you to select from in 2024.

We start of the candidates with a new sire group from Red Six Mile Mossy Oak 175h. Lancaster weaned off at 640 lbs in August 15. He ranks in the top 20% for WW and top 10% for YW, good growth. On the maternal dam side a very nice Unanimous daughter in our treasured Oasis lineup of cows; which are thick, good uddered and exceptional feet. All going back to TR Escalade from Thistle Ridge and he was definitely a foot, and udder improver.

17L was our 2nd highest weaning calf at 680 lbs just to prove the Crackerjack sons are lighter birthweight bulls with a growth. He is my 2nd top gaining bull at this time with a 4.2 lbs/day gain. Lacombe 17L is in the top 9 % for BW. This combination of Rickards Red females; whom are known for there depth, square hip and good feet, just plain works on this combination. 17L has a great hip also and a great personality.

From DNA this guy ended up being a Crackerjack son. 21L weaned OK but took his time in deciding to put on lbs but after January 1, his weight gain was an impressive 6.5 lbs/day. I call him Oakey for that, He is a smaller framed bull with a lot of growth. His dam is absolutely beautiful Head Games daughter who has turned quickly into one of my favorite up and coming stars and now you can see why; NOTE: this is only her first calf and she did a fabulous job while breeding back on time for 2024 and I can't ask much more from her.

Another Mossy Oak son out of a Crackerjack daughter. Now you can see the trend. Low birthweight, good growth what more can you ask for. The dam is from our Lydian cow family which is the original cow family that Yarrow Creek Ranch began on. Just a little side note that this line of cows just doesn't seem to ever have sand cracks; but awesome feet and superb udder and teats all along.

The last 2 Coming in Hot 24E straw of semen was used here. From 367 progeny registered to date I think Coming in Hot has been one of the most consistent bulls in producing bull calves and heifers ALL of equal quality. The Musgrave Aviator influence has been phenomenal into this pedigree. These Coming in Hot sons will give you good growth and keep all the females they will be good.

This is one of my favorites in the bull pen this year. He was the No. 1 weaning weight bull in the Red division at 702 lbs at August 15th; can't imagine what he would have weighed if we would have waited until September to wean. A growth bull from our Lakota line stemming again from the TR Oasis sired group of cows which have just been a standout. He was gaining over 4 lbs/day at catalogue time. Really nice combination here sire and dam side.

Take advantage of this one; Long Arm is our LAST U2 Mission 61W calf, I kind of wished it would have been a female as they are the best all round cows I have ever had with perfect udders, feet, and built to last. When you see this guy in the pen he always catches your eye; he is just a looker. If you want to retain females this is the bull to buy. Mission X Crackerjack is as good as it gets. The dam goes back to the Lauron Blackbird 94F calf I bought out of the Chinook sale, and Laurie still says she wishes she didn't sell that one.

Not only was Long Shot 43L appropriately named as he calved on our cutoff date for A.I. calves but he was worth the wait. What I like about this fella is "consistency". With the sire Coming in Hot having 367 progeny and the grandsire Redemption having 726 progeny you can be assured this bull will get it done for you. Also the females on both sides of this bull are nothing short of a perfect angus cow. The Nice all round EPD's also.

This Crackerjack 54L is quite special, just look at his photo. The dam Blackbird 15102C is an **Elite/Premier Dam** at Yarrow Creek, we sold a female at Red Roundup from this very dam going to the Kaufman's at South View Ranch in SK. This dam is still in production at Yarrow Creek with 8 calves to her record with a 103 WW ratio and a 109 YW ratio, all with bull calves avg 85 lbs and heifer calves avg 73 lbs. To be a cow of this caliber to remain on our ranch says something. Take advantage of this bull to build a whole herd around

A Crackerjack son out of our treasured Princess line of cows. The dam 1476B is a direct Thistle Ridge Oasis daughter and she is a tank, her bull calves have averaged a 114 YW ratio on 2 bull calves and we have kept all 4 of the females in our herd; they are just flat out good, and don't disappoint. LeeJack was weighing 1240 lbs and gaining around 4.0 lbs/day. Another bull that will enhance anyone's herd with great steers and awesome heifers.

Lennon 77L comes out of one of my favorite Redemption dams, perfect udder, feet, and a great attitude and a super calving ease female. Her bull calves have averaged 84 lbs and females avg 74 lbs. This guy is made for heifers, smooth front and a nice hip also. Don't be afraid to keep heifer calves off of 1st calvers with a bull like this every female will be worth keeping.

Lexington 87L is a grandson of 1542C cow which is also the dam of the highlighted 39L bull. The dam is also a Redemption daughter which is why with the combination of Crackerjack I will say he is safe for heifers. He is in the top 2% for BW.

This guy is appropriately named as the dam all Canadian 15110C was stifled before she calves but as the trooper she was she gave us one more calf. I won't lie I was actually hoping for a heifer calf, as she was a tremendous moderate framed cow with a picture perfect udder and great feet (never touched) and built like a truck. This calf was grafted onto another cow and raised by it. I only rated this guy as 2 stars as the cow Annie had the ability to deliver bigger calves.

Power bull here, just like his name a Luger cocked and ready to go; I just love the picture of him long big nutted and big hip. With Heavily Armed as a sire combined with Unanimous and Mission probably one of the best footed bulls in the pen. I have rated as 2 star because of his lower BW but this bull has some punch but on the dam side it's all moderate BW.

Liverpool kind of has a cool pedigree. His sire Foreigner 169G has a full brother from U2 which was Grand Champion at Farmfair in his class and was also a champion at Agribition. The heifer calf we sold this year at Red Round Up was a 169G sired heifer. The daughters we are calving out now from 169G are absolutely tremendous but that is exactly what we had anticipated with the famous U2 Anexa 271Y as Foreigner's dam. I have Liverpool rated as 2 star because of the higher BW I know Foreigner can do depending on the females he was mated too.

An All Canadian bred bull with Heavily Armed and Malbec on the dam side. I'm always amazed what heifers can do with the right breeding. Lafayette weaned off a healthy 618 lbs on a 1st calf heifer; impressive; but good breeding should provide that right! He's a good performer avg 3.37 lbs/day and he is in the Top 20% WW, and Top 30% YW, and also Top 20% in Milk. All around herdsire for some lucky cows.

**PEAK DOT CEDAR 417C**  
CEDAR OF PEAK DOT 762W

This PDAR Colossal herd bull is a gem, 806G is moderate framed and is as thick & beefy as you can make one. A flush from a beautiful premium "Ceder" of Peak Dot dam - 762W, Colossal boasts a +14 calving ease EPD's and remains good footed after 5 years of age. The 9 bulls of his that sell today are all weight gainers and closely matched in phenotype. Colossal is probably the best bull we have used to date. We knew he was special the day we selected him at Peak Dot's. His sire Musgrave Colossal just keeps picking up steam, SAV now owns an interest in the bull, so look for even bigger things out of him. This is the 2nd year we are calving out daughters and they are exceptional.

The "Ellingson Profound 8155" progeny remains popular. In their 2024 - Feb 3rd sale, Ellingson Angus sold 43 Profound sons. A thick stout bugger from front to back. Ranks in the top 1% for weaning weight, yearling weight (139YW) and hoof Claw EPD. Pride of Peak Dot elite dam, 88B, pictured a nice udder and Milk EPD in the Top 1%. She produced PDAR Seedstock 38F and PDAR Lancaster 86G used back in the Peak Dot herd.

I still miss this bull. He had such a nice deep hip, thick and square. Great disposition, good feet and a nice calving ease front. Over the years he produced phenomenal females that remain in my herd. He lives on through AI and we probably should use more of him just because of his incredible females we have to date.

Here comes a rugged Profound bull that would be a nice match for some mature cows. Combining volume and thickness with a good foot is the Profound moto. Born Feb 18th, the youngest bull for me in the sale and you would not know it, also gaining 4.1 lbs/day and coming on string. Jan20th weight of 1304LBS equals a YW111. His mother's progeny = 90 lb bull calves and 72# female calves AND +11 CE. From LIMA you will get good sized calves in the fall.

## Elite Heifers

YCF Dana 2327L Masterpiece sold to Bear Creek Angus, SK

Red YCR Princess 23138L  
Red Round Up sold to Kingsview Farm, Ontario

Yarrow Creek is not in the habit of selling females but in 2023 we did part with these 2 elite females sold at select sales. This year Yarrow Creek Farm selected these 5 top end females. They have only been fed hay and corn baleage and have gained very well. Pictured by us and with not the best weather condition, you can remain confident in your purchase today. A nice package of heifers, meticulously bred over the years that will fit into anyone's program.

I do like this calf's wedge-shaped mother, she has a Top 1% score in feet and holds a BW average of 80#. Grandsire has 522 progeny to date with AVG birth weights: Male 82# and Female 78#. That is impressive!! **61L** carries that nice YW EPD of +105 also!! You will enjoy her.

A tuff one to part with. Great granddam and Grand dam and Dam are pillars of my breeding program and have all been excellent producers here. Crossed with the Belvin Highmore sire, this heifer has all the fundamental necessities of soundness and production to her name. She's got what it takes!!!

Welcome to our 12th Annual Bull Sale! Somehow, twelve years seems like it was yesterday and a long time ago, all at the same time. As we reflect on that, we would like to thank everyone who has supported our program over these years. We appreciate your trust and we really enjoy our associations with you.

We're very excited about the bulls for the 2024 offering. A lot of the bulls are moderate birthweight bulls that can be used on heifers and cows. They performed very well given the poor pasture conditions -no creep feeding- and are ready to perform for you. We had some much-needed moisture in late January, but the bulls ended up a bit dirtier on picture day than we hoped. Take a closer look under that mud- the bulls look great, and even better in person!

Our focus remains the same: sourcing and finding new genetics that will improve our cow herd and your cow herd. We try to focus on feet, maternal qualities, carcass quality and calving ease and avoid the extremes. Every year we feel like we've raised the bar for our herd and this year is no exception. You are all invited to come by anytime to have a look at the bull pen. Even if you're not sure if you need a new bull this year, we enjoy the visit and an excuse to stop and eat treats.

We value your time and know that there are many Bull Sales options out there, so to show our appreciation, Visitors will receive a \$200 credit towards a bull they purchase at the 2024 sale.

We are very thankful to our customers, neighbours and friends for your trust and confidence in our program. We strive to earn your business by providing the very best bulls possible and customer service to match.

### BULL MANAGEMENT

We strive to provide our herd the best possible feed ingredients and health protocols to ensure optimal health and growth throughout their lives. At birth the calves are given Enforce and Vit ADE and warm head gear if the weather is cold enough to freeze those delicate ears.

When we turn out for summer pasture in late May early June, the calves are given Pyramid FPS with Presponse, Fermicon 7/Somnugen and Long Range. At this time, we also take the calves weights and hair samples for DNA.

When the calves come home in the fall, we give them a booster shot of Pyramid FPS and Fermicon and give them Ivermectin or Cylence pour on. We weigh them again to get their weaning weights.

We feed alfalfa silage to our herd, and start the bulls on a alfalfa silage/Timothy ration to begin. We then introduce a pellet ration from Bullseye Feeds into the ration. We slowly increase the pellet ration to 1% of body weight of the animal and eliminate the timothy from the ration. We feel this ration helps the bulls to grow into their genetic potential without pushing them to hard and burning them out and reducing their long-term breeding potential.

All bulls are semen tested by the wonderful staff at Fort Macleod Vet Clinic a few weeks before sale day. At this time the bulls are given their first shot of Fusaguard for prevention of foot rot. The booster shot is given before sale day.

- Honcho was my top pick at the Wheelers sale in 2022.
- He provides moderate birth weights and calving ease, which are in the top 10%.
- His Dam Auburn 19E, is a donor cow at Wheelers and is an amazing cow.
- Also, very important was Honcho's foot and leg structure, which is very good.
- His offspring have been exactly what I was hoping for, and they will be a big part of my red herd going forward.

- Heifer project or cows, the results will improve your cow herd.

***PDAR Colossal 806G enjoying summer pasture with his herd.***

**Ranchland Livestock Supplies, Maple Creek, SK  
Portable Solar Livestock watering systems**

It is such a pleasure working with Yarrow and Gurney on their Nutrition program. Even though both ranches have different feeding programs, their goals are the same to bring a quality product to their customers.

The feeding program is built to maximize forage utilization and gut health. The bulls are developed on grass with their moms and then moved onto a balanced diet that promotes lean muscle growth. Organic minerals are used to ensure proper immune function and overall health. The bulls' nutritional health and development and the entire cow herd are of utmost importance and are continually being tweaked to meet environmental and seasonal conditions. If you have any questions about the nutrition of the sale bulls, please feel free to call. Best of luck on sale day!

*Good luck on sale day!*

© More Than Just Feed

### – TERMS & CONDITIONS –

**Terms of Sale:** The terms of the sale are cash or cheque, payable at par at the sale location. No release of livestock will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for which payments have not been received prior to departure time.

**Certificates of Registry:** A certificate of registry will be duly transferred to the buyer by the breeder for each bull after complete and full payment has been made.

**Cattle Inspection & Identification:** CCIA tags will be in all bulls. All bulls will be available for inspection prior to the sale.

**Fertility:** All yearlings will be scrotal measured and palpated prior to the sale and all yearling purchases will be semen tested prior to delivery. All bulls will meet or exceed breed standards.

**Breeding Guarantee:** We guarantee to provide you with a sound breeding bull, capable of passing a breeding soundness evaluation performed by a licensed veterinarian. In the unlikely event of any dispute, the regular terms and conditions that are standard with the Canadian Angus Association shall apply. Customer satisfaction is paramount to us.

**Delivery of Bulls:** We will offer free delivery within 200 km. of home; after that at cost. Delivery on the yearlings will commence early April unless prior arrangements have been made with the seller.

**Post Sale Bull Development:** We will winter your yearling bull purchases free of charge until April 1, 2023. After that, feed at cost of \$3/head/day will be charged. All bulls returning to the consignors' must be insured. All bulls will be housed at buyers' risk, the consignors will not be responsible for any type of injury while the bulls are in their care.

**Bull Insurance:** Ownership risk to the purchaser commences when the Auctioneer's gavel falls. Livestock coverage will be available at the clerk's desk from our appointed representative on Sale Day.

**Accidents:** Although every precaution will be taken to protect the safety and comfort of the buyers; neither the sale staff nor the owners assume any responsibility in this manner and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

**Announcements:** Any changes from information in this catalogue will be announced from the auction block. Such changes will take precedence over the printed matter in the catalogue and therefore buyers are cautioned to pay close attention to any such announcements.
