*Farm & Ranch*

**BLACK & RED ANGUS HERD DISPERSAL**

*November 18, 2024 at Noon*

Perlich Bros. Livestock , Lethbridge, AB

# Welcome

## Yarrow Creek Farm & Ranch

A warm welcome to the Yarrow Creek Farm & Ranch Complete Herd Dispersal. For us a time to celebrate our Angus breed cattle. In the spring it was with mixed emotions and a few good conversations in the pen that we made the decision to have this dispersal. We get attached to our cows somehow along the way. That slow progression of knowledge and numbers, learning and growing, to achieve that goal, to look back and be proud of the hard working – honest RED and BLACK's we offer you today. It is a satisfying feeling today to hang out in the pasture with them, Dennis and I can have conversations on each one. We feel the entire herd is consistent. The purebred registered Angus breed has certainly been good to us!!

We raise our cattle to deal with the elements that are put in front of them and our selections over time has paid off. We DNA parent verify, semen test and provide you with all the EPD information we think you are looking for. We also work hard at A.I. and herd bull selection, matching them carefully to our Mama cows. We believe you have to have the best cows to raise the best bulls. If there is something we are not providing for you or you have any questions, do not hesitate to ask us.

Today is a wonderful opportunity for you to select from a sweet set of Bred Heifers, a Heifer pen that is deep with quality, young fresh Bulls that are ready to go to work in 2025 and last but not least, the prolific Angus Mother Dams.

To all our customers over the years, who have placed trust and confidence in us, we are honored to have your business and are thankful for the relationships that have been built. We do respect and value all of your opinions too. We appreciate your support. We look forward to staying connected with you in the future.

We are also blessed with support from our six kids and their families, numerous fun friends and those close neighbors who get to listen to the bawling calves. What would we have done without you? All who have helped us process cattle, eat food and drink, the ladies who have lent a hand in the kitchen, thank you so very much. The past years of sales included Tony & Lorraine Bruder (Twin Butte Simmentals), Heather and Norm Dodd (NHD Simmentals), Roger & Lori Thomson and Wes & Carolyn Gurney (Black & Red Angus). We have enjoyed your company and working with you on those prior sales. From the picture pen: Grant Rolston, Sarah Hasson, Jill Renton, Jordie Buba and your helper Darren and Nicki Ross and your helper Prairie McNeely, SUPER JOB and no complaints, we were so lucky to have you all. Jeff Trask generously came this July and clipped all our cows. A long time ago, since 2011, we found out about Kristen Edmunds, who clipped for Sproule Charolais at the time. She committed to being our "CLIPPER" ever since, so how fortunate we have been to have her and all of her helpers too!! – Thank you Kristen.

We plan to keep busy – moto being "Just stay on the galloping horse".

Come join us for a steak dinner at 11 AM on the day of the sale, we look forward to seeing you all there.

# OBI Welcome

Welcome to the Yarrow Creek Farm & Ranch Dispersal Sale. Dennis & Linda have been building their cow herds over the years and now it is time for you to capitalize on this opportunity. These cattle just saw grass all year, since they had some rain finally down south and look at the great shape they are in.

The Red Angus Division is such a uniform set of females, bred up the right way. The pedigrees throughout the catalog are focused on top-end walking sires he obtained with throughout the years while using very popular A.I. sires to enhance the marketability of this cow herd. The catalog was developed with the bred heifers starting off and going to the older cows at the end with many top end heifer calves and a great set of bull calves. Cow families very so very important to Dennis, so follow the footnotes to see daughters, maternal sisters and dams to the lots. If you want to add some size to your herd, the Red Angus are larger females with loads of substance.

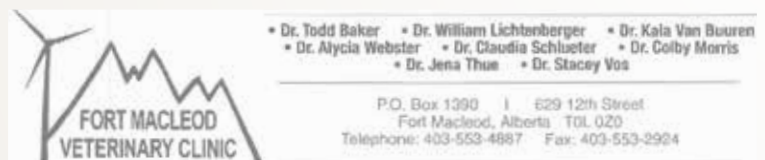

The Black Angus Division is also a tremendous set of females ordered the same way as the reds with the bred heifers starting it off and going to the last females in the offering. Females were obtained from KFC Farms, Johnson Livestock and U2 Ranch throughout the years; they are the foundation of this cow herd. Herdbulls were added to enhance the cow herd and A.I. bulls were sourced to what Yarrow Creek likes. They did a great job as you will see, the heifer calves and bull calves are something to check out.

Also selling will be 3 young herd bulls just bought this past spring, they bred very well and now you have another chance to grab these genetics. Yarrow Creek always bought top end walking herdbulls as they knew the importance of them. You can go through the Ref Sire section to see all of them. Semen also will be at the end of the sale.

The cattle can be viewed at home until the 14th of November, they will be trucked to Lethbridge on the 15th. From the 16th to the Sale Day, they will be displayed at Perlich Bros. We will have the sale on DLMS as well. No videos of the offering will be available. All animals have been pregnancy tested with estimated due dates from the vet.

I have been thru all the tremendous offering, and I can help you in anyway please do call me or visit with Dennis and Linda or any of the sales staff. Come join us in Lethbridge for a sale that will enhance the Angus breed.

The Fort Macleod Veterinary Clinic has been proudly working with Yarrow Creek Ranch to ensure the highest standards in herd health.

Yarrow Creek Ranch has followed a strict herd health and vaccination protocol for the last 20 years. All calves receive Inforce 3 at birth followed by Fermicon7/Somnugen and Pyramid FP5/Preponse at branding and weaning. Mother cows are vaccinated yearly with Express FP5, Tasvax and Scourbos 9. Heifers are vaccinated pre-breeding with Express FP5. All animals are consistently fed a mineral supplement and all calves have received Vitamin A/D/E and selenium at birth. All animals are routinely dewormed with Ivomec.

On behalf of Yarrow Creek we have appreciated the dedication and service from Fort Macleod Vet Clinic from the beginning with Dr. Bruce Kostelansky and Dr. Bill Lichtenburger and the ongoing service with Dr. Todd Baker and especially Dr. Claudia Schlueter.

# Terms & Conditions

## VIEWING OF CATTLE

The viewing of cattle at the farm can happen any day leading to the sale; call ahead please. Cattle will be displayed at Perlich Bros., Lethbridge, Ab. from Friday November 15 to Sale Day. All cattle will have Ear Tags with Lot Numbers and tattoos corresponding to the Catalog.

## TERMS OF SALE

The terms of the sale are cash or cheque, payable at the sale location. The right of property shall not pass until after settlement, no invoicing on buyers in attendance, unless previous arrangements have been made. All cattle will sell under the standard terms and conditions set forth by the Canadian Angus Association.

## BIDDING

Every animal entering the sale ring will be sold to the highest bidder.

## DISPUTES

In case of disputes, bidding will be reopened between the parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision of all disputes is final.

## ANNOUNCEMENTS

All announcements made from the auction block will take precedence over the printed matter in the catalogue. Buyers are therefore cautioned to pay close attention to any such announcements.

## BREEDER'S GUARANTEE & PREGNANCY INFORMATION

As this is dispersal, all females will sell with no further guarantee. All serviceable age females will have been pregnancy examined by an accredited vet.

## DNA TESTING

DNA testing the coupons in these females is the responsibility of the new owner if there is a discrepancy. All animals selling is Parent Verified.

## MATURE BULLS SELLING

The Mature Bulls (Lots A, B, C) selling will have passed a semen test prior to the sale and the semen papers will be at the sale for insuring these bulls. These bulls will not be wintered by Yarrow Creek, and they need to go to their new home's sale day.

## BULL PURCHASES AND WINTERING

Terms on 2024 Yearling Bulls is 100% due sale day. A wintering program is available on all bull purchases. A wintering fee of \$800 per bull calf is payable at the time of sale to the sale clerk. Bulls returned to us for winter must be insured. Bull calves taken at the time of the sale will sell with no further guarantee. All bulls must be picked up by April 30, 2025, after they have been semen tested and ready to go. These bulls are 100% Guaranteed and will all be Semen Tested. If They don't pass a semen test the value will be given back.

## CERTIFICATE OF REGISTRATION

Each animal will carry papers issued by the Canadian Angus Association unless otherwise stated. A certificate of registry transfer will be furnished to the buyer after the full and final payment has been made.

## EPD'S

EPD's are current at the time of Printing. Breed Averages are the following:

BLACK ANGUS - BW: +2.0 WW: +54 YW: +95 MILK: +23 CE: +3.3 MCE: +6.5

RED ANGUS - BW: +1.3 WW: +43 YW: +74 MILK: +24 CE: +2.3 MCE: +5.3

## TRUCKING

Please do bring your trailers to the sale as all cattle will be leaving the Auction Mart Sale Day. Please do make Prior arrangements if unable to bring a trailer. Cattle can leave anytime from Auction Mart as Long as paid for with the clerks. We will also be coordinating trucks the next day if we need to do so. All costs are for the purchaser.

## LIABILITIES

All people attend the sale at their own risk. The seller, facility owner and sale manager assume no liability legal or otherwise, for any accidents that occur. It is understood that OBI Livestock Ltd. is acting only as a medium between buyer and seller and is not responsible for any failure on the part of either party to live up to its obligations.

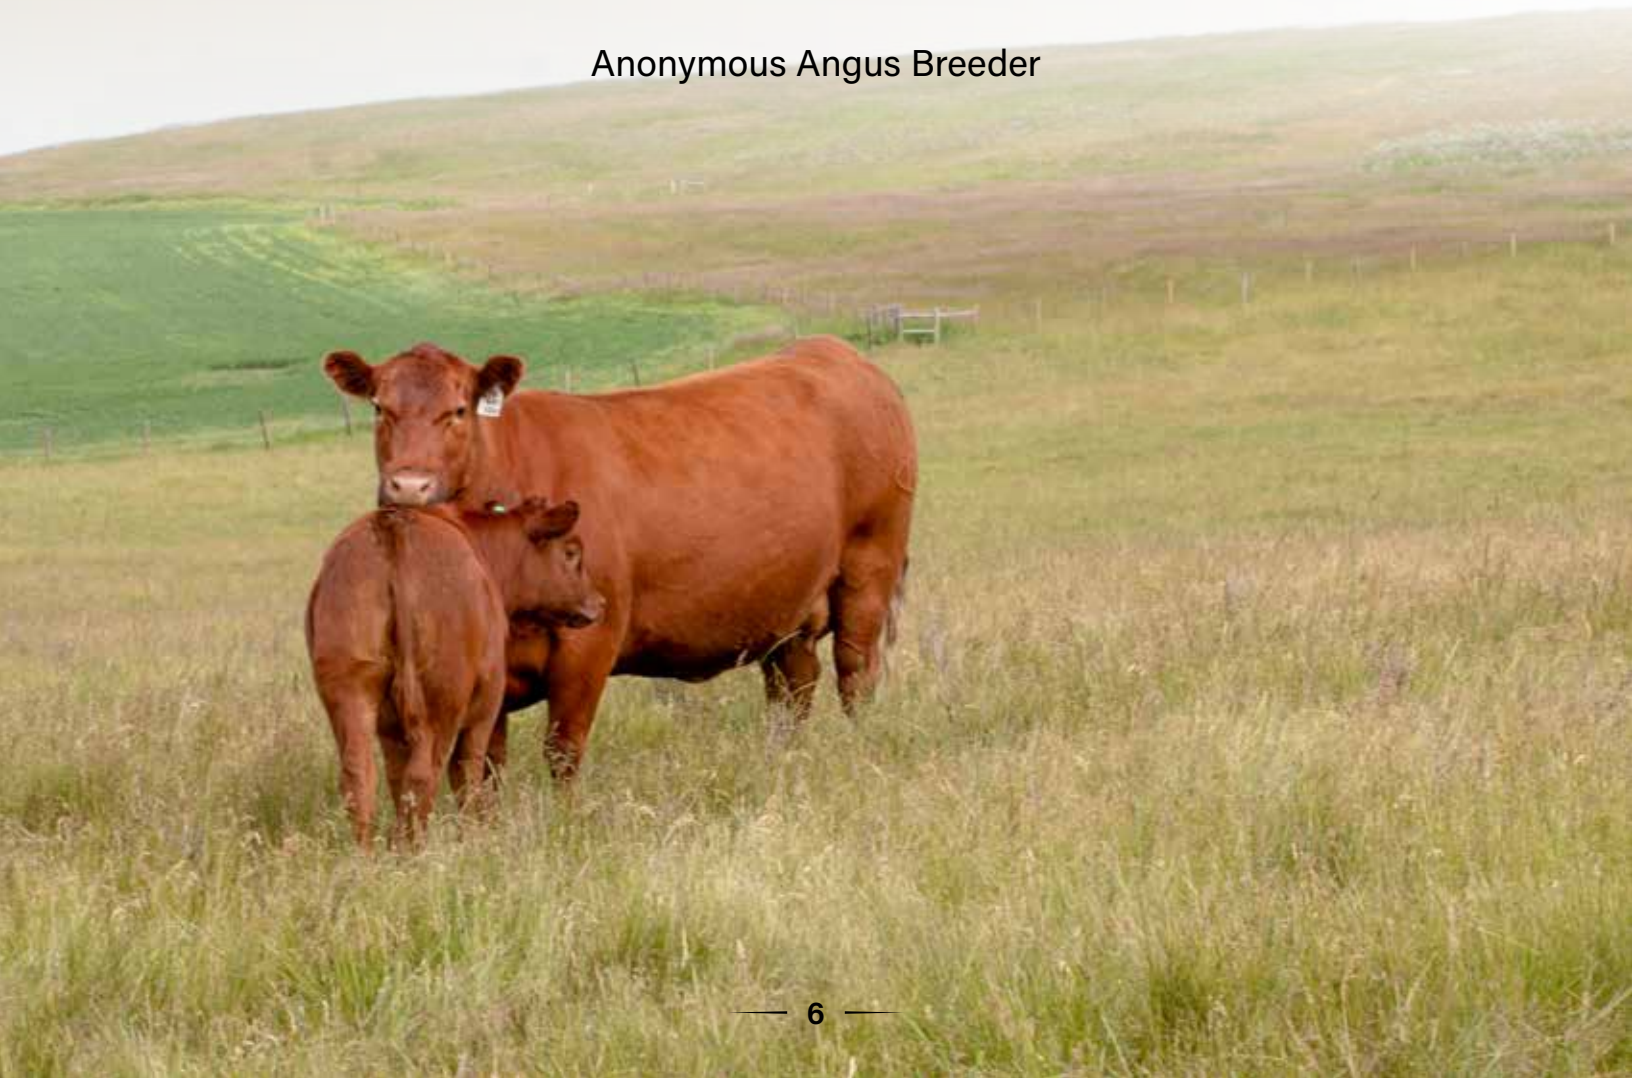

# Yarrow Creek Ranch

## Red Angus

Over the 27 years committed to the breed, Dennis has found the industry both rewarding and challenging. He began his Red Angus adventure in the fall of 1996 when he visited his 1st Red Roundup and purchased Red Clear River Lydian 67E & Red Clear River Marsha 35E. He was SOLD!! His journey from buying his new farm and moving his RED herd to the southeast of Pincher Creek was in 2000, it was a big change from irrigation to dryland. Located on the Yarrow Creek, hence "Yarrow Creek Ranch Red Angus" was born. True homesteading began. Seeding the land back to grass, building fences, water sources, shop, corrals etc...it truly was a process.....but we also truly love where we live.

"To breed Angus is good; to breed good Angus is better, to breed Angus is an achievement! It is an endeavor which lasts a lifetime; which tests the resourcefulness, intelligence and judgement of a breeder. It is a labour that never ends, but never tires".

Anonymous Angus Breeder

**REF** Red Wilbar *Crackerjack* 73F

WJD 73F / February 17 2018 / 2060871

<i>Sire</i>	RED LSF SAGA 1040Y	RED BECKTON EPIC R397 K

When we saw the video of Crackerjack he had all the characteristics we looked for in a herd sire; great feet attractive phenotype and proven genetics. When Cockburn and Wilbar bought Specialist we watched with keen interest looking for the right one; up came 73F. Originally named Specialist 73F we changed his name to distinguish him as what he was, a "Crackerjack" of a bull. With paternal sibs of Assassin, maternal sibs Tannerite (2024), and sons Tempo (2021) Crackerjack is becoming a true legend in himself. Ranked #1 in BW EPD and #2 in Milk EPD this sire not only calves easy but when crossed with powerful females a curve bending balanced EPD is the result. One of the best things of Crackerjack as he stood on a wide perfect foot for his entire career and was a gentle giant with an outstanding phenotype; not many of these bulls have surfaced over my career and he was a "Legend" at Yarrow Creek and we look forward to what his offspring will bring to the industry into the future. Canadian and US qualified semen straws will be for sale.

Looking for an AI sire in 2023 I always wanted to use Rolling Deep so a phone call to Ben Tams and I bought the last of the Rolling Deep semen. When Ben Tams bought Rolling Deep, a lot of people wondered what he was doing. But to no avail Ben's keen eye was always true to what he was looking for to improve his herd. After seeing some of the females on Thistle Ridge Ranch sired by Rolling Deep, I knew Ben was right. Many people have used Rolling Deep with great Success; LWNBRG Cross Over, Red Lauron Block Buster, and to have Bieber's buy back the bull said volumes of what he had become. 275 progeny in Canada, 1300 progeny in the USA and 120 daughters in the Bieber herd alone. The bull calves and heifer calves will be a true highlight of the dispersal.

Head Games is another herd sire that stems from a very maternal cow family. The Lass 509K had great progeny with WW ratios of 107. This guy was an impressive individual as Wood Coulee's pen of 3 at Agribition in the fall of 2019; He was admired by many. His progeny as heifer and bull calves look great.

Originally, we had intentions of buying Red LWNBRG Slowburn 102H but Dennis Leewenburgh had decided to keep him for their own use. I quickly purchased a semen package; the results were outstanding. 102H with his unique phenotype combined with the top 1% WW and top 3% YW led us to choose to keep a son 51K for our own use. He had a higher BW but he was an unbelievable calf with that herdsire look. Glad we did; 51K is built like a brick "house" His calves averaged 85 lbs BW; and the bull calves all had a WW Index +110; impressive. The Slowburn sons & daughters will be lookers on sale day.

When we knew, we were deciding to Disperse I went after the best Red Angus Semen I could for our bred heifers and 1st calvers. Always admired the sire Seneca 731C and what he has done at Rhodes Red Angus. After visiting with Jordan last fall in Faulkton, NE. I knew we had to bring this son into our program. The maternal qualities of this bull are 2nd to none. Long lasting females that produce and very fertile. Copper 929G sires many high sellers in the Cockburn Red Angus Bull Sale this past March. They were all calving ease bulls with huge performance, what we all want.

I also secured Confidence 3010, a Copper 929G son that sold for \$30,000 to C&C Duvall Ranches at Granada, Co. Mark from OBI also saw this bull and he was his pick of the calving ease bulls at Cockburn Red Angus. 3010 is from a very maternal Cora 1066 stemming from Jensen Kargo and Ter-Ron Big League. He was a 60 lb BW and Ward had him at a 3-star calving ease. His service is also to the bred heifers and 1st calvers. These Confidence calves will be curve benders as their sire is. They will also be the first calves to hit the ground in Canada.

From touring the Bar E-L herd we truly admired the Bar E-L Leading Lady 7C cow and just so happened Rickards Red showed up in the Allison Red Angus bull sale in 2018. Knowing the maternal side is what we always strived for. Rickards Red cows are all big and broody that throw a fantastic thick calf. The Red angus division was truly influenced by Rickards Red and especially the Leading Lady genetics; he did an awesome job at Yarrow Creek Ranch.

A bull we selected because of the female U2 Anexa 271Y; one of the high selling cows at the U2 dispersal. This cow is one of the greats in the Red Angus industry to this date. She has improved the foot and udder quality of all progeny along the way. With her flawless phenotype and angularity, it is a part of the puzzle we wanted to introduce into Yarrow Creek herd. Now for the sire side, Foreigner has 640 progeny in Canada alone; why is that? As OLE Farms put it when they bought him that he was the "BEST footed bull they had found in all of North America and the calves were outstanding". So, the combination of the 2 pedigrees was a no brainer for us.

Alisha Minchau at Shiloh Cattle Company did a fantastic job raising this bull. When we 1st laid eyes of him in 2021 standing on correct dark hoofs with the thickness of a truck, we were impressed. It was a hard-fought battle but we ended up owning him as the high seller that day, and Alisha couldn't stop smiling. This gentle giant became an incredible herd sire. Take a hard look at the bred heifers and heifer calves from Heavily Armed, they are outstanding.

Sometimes bull selections surprise you. Back in 2014 we ventured out to Lauron Bull sale in April looking for some replacement heifer calves. Well we came across Apex standing in the stall. Linda and I looked at each and new we had to own this bull. With his EPD

numbers at the time BW -1.6 we weren't sure how he would perform. Well he bred a bunch of cows that spring and low and behold the calves all came out around 70 lbs; not what we expected. So we turned around and bred him to all of our heifers the next year. Yup a heifer bull in disguise. Apex grew up to be an outstanding herdsire with great dark hoofs and correct feet. We had 101 progeny and his EPD's grew to top 15% BW and females were exceptional.

A direct Redemption son which I was the first to use in Canada; you will see him in a few pedigrees throughout. Exemption sold to our good friends Bill & Cecile Homans in 2015. Bill kept raving on how good he turned out; so a trek out to Cornerview Ranch and had a look at him. We decided we had to own him back. He was long as a truck and great feet and we kept every female we could off of him.

A bull we purchased from our good friend Ben Tamms Thistle Ridge Ranch back in 2012. This bull had so much meat and hind quarters standing on great feet we decided he would be a great match for all of our easy calving cows. Well that match worked; If you look closely at the pedigree a lot of our cows trace back to Oasis; they just plain worked and why not the sire Escalade produced 183 progeny; the great granddam was an Elite / Premier sire for Thistle Ridge and these cows were just standouts in the pasture ALL the time

We were looking for a new heifer bull and came across Red U2Q Mr. President 3368L. From looking at his pedigree it was interesting to learn the dam Red U2 Misty 60Z, grand sire of 3368L, is a bull I owned at one time, Red U2 Flutie 941J. 941J was the only herd sire I ever showed at Farmfair as a 2-yr-old, he came 3rd in the Championship run. On the dam side of 3368L has a long list of proven females: SAV Blackcap May 4136, Red U-2 Anexa 428B, Red U-2 Larkaba 8133U, and Red U-2 Misty 60Z. The neat thing about this bull is the SAV President 6847 outcross. His ET brothers sold for \$52,500 (high selling RED), \$19,000, & \$13,000 on that same sale day. He holds a +11 CE, good footed and lots of Milk, +33. Lots of ambition and very safe to use as a calving ease herd sire.

From the Rainbow Red Angus Dispersal I was intrigued by the LFE Turbulence 3028Y daughters sold. I talked to Kolby Heaven afterwards and reaffirmed how good they were. Red Rainbow Metric 106K sold for \$60,000 and Turbulence was the sire of his dam. Just by chance I was looking through the Lewis sale cattle catalogue this spring and came across LFE Beretta 3218K and his dam was sired by Turbulence. On the sire side he is from a Y Coulee bull sired by Red U2 Riff 1213C, a high seller himself in 2016, and he is also a Reckoning 149A son. With that proven pedigree and progeny born it was a no brainer. Once I saw the video on Beretta, I knew we had to own him as a herd sire for Yarrow Creek.

An impressive Bred to start the REDS!!! Red Larkaba 2322L is the result of a great combination of Mossy Oak and Crackerjack. With the added length I believe Crackerjack brings to the pedigree, you get an outstanding female with an impressive growth package combined with calving ease. Larkaba 2322 has a WW ratio 102 & YW Ratio 119, she is setup for the future. She was the No#2 WW heifer calf in our Drought of 2023, amazing. Dam is Lot 59.

Another Red Six Mile Mossy Oak daughter from a U2 Mission 61W sired dam. In my opinion Mission 61W provided some of the most outstanding consistent females over the years with picture perfect udders, feet and phenotype. 2356L is following in her footsteps. Cool feature: the Lydian cow family traces back to the original Lydian female Red Clear River Lydian 67E purchased at Red Round UP. The Lydian cow family has been very strong in udder quality, feet and stoutness. This girl is packed with great herd sires Flying K Storm 59W, Red Howe Mr. Matrix 7L, and if you go far enough back, dam Red U2 Anexa 09E which was one of the foundation cows for the U2 herd. Top 4% WW Top 2% YW (+110). Dam is Lot 41. A.I. APR 12 TO RED RREDS COPPER 929G. EXPOSED APR 15 TO JUNE 20 TO RED U2Q MR PRESIDENT 3368L. DUE FEB.

Dam

2368L is a female built for longevity, the dam 1960G (Lot 63) along with paternal grand dam 1809F (Lot 75) are all in this dispersal. The Larkaba cow family also traces back to the original Red Tassell Larkaba 26G cow I bought at Red Round UP (1998) and she delivered 10 calves. The Larkaba family alone has provided 41 progeny over the years, so very productive. We have based our program on consistency and with NCJ Coming in Hot, Rickards Red, Apex, Redemption all in the pedigree we stand by 2368L with a lot of pride. Dam is Lot 63.

This bred heifer is probably my favorite for phenotypically. The dark red color in combination with a solid flank all on correct feet. The Princess line of cows has always been my favorite from the first one I purchased, Red Fine Line Princess 54S. The granddam of 2373L, Red YCR Princess 15105C, was an Elite/Premier Dam with an average life ratio of 109. Dam is Lot 42. A.I. APR 12 TO RED COCKBURN CONFIDENCE 3010 . EXPOSED APR 15 TO JUNE 20 TO RED U2Q MR PRESIDENT 3368L. DUE FEB.

Purple Alert. We have never ventured into this category before but when Linda had a few openings in the breeding pasture with Belvin Highmore I sneaked in a few of my best females. One of the results was this standout heifer. Highmore needs no introduction; a breed leader. The dam Lakota 1504C is one of my feature cows as she is a direct Oasis daughter and the maternal side stems from the special cow Red U-2 Lakota 434X. Dam is Lot 100.

A cherished 3-year-old here with lots of milk. The Lady family stems back to the Shoderee Dispersal on the Red Shoderee Lady 11W cow. 11W is progeny from the great Red Stewart Clutch 19T which came from the Red Jewel Miss Pathy 62A which produced 61 progeny (embryo's) over the years. Lady 138K carries a WW ratio of 104.

A.I. APR 12 TO RED COCKBURN CONFIDENCE 3010 . EXPOSED APR 15 TO JUNE 20 TO RED U2Q MR PRESIDENT 3368L. SAFE TO A.I. DUE JAN 19.

Might be one of my favorite 1st calvers, a Slowburn daughter from our Minola line of cows. Minola 39G goes back to Red SSS Minola 430E we purchased out of the "Tradition with a Vision" sale on Triple SSS in 1996. Well, she was a gooder, with 12 progeny left behind. The entire Minola line has produced 39 progeny over the years. Data proves they are fertile and stay around in the herd. Sometimes a hard feat to accomplish here at Yarrow Creek. Dam is Lot 74. Maternal Sister to Lot 46. A.I. APR 12 TO RED COCKBURN CONFIDENCE 3010 . EXPOSED APR 15 TO JUNE 20 TO RED U2Q MR PRESIDENT 3368L. DUE FEB.

This cow is special to me; as solid as they come. A daughter of Red YCR Barack 1420B from the Princess cow family (54S), on the maternal side Red Ross Abbie 23X was raised up at Clear River Red Angus. I bought her at their dispersal in the fall of 2018 as she was the top heifer calf in my opinion. And just look how she turned out. Top 15% for CE and BW. 5 calves born to date averaging 78 lbs. Female calves have a WW index of 102 and YW index of 108. Straight Canadian.  
 EXPOSED FROM APR 15 TO JUNE 20 TO RED YCR SLOWBURN 51K. DUE MID-LATE JAN.

Save the best to last!! Red YCR Lakota 2401 was a standout in the pasture all summer. Everyone that toured found this elite female. She just stood out like a queen. She was the #1 weighing heifer calf at 794 lbs WW. Just incredible. She has the EPD's to back her beautiful phenotype up with Top 7% Milk, Top 15% BW, Top 25% WW, and Top 30% YW. This female will do some incredible things at her new home.

DAM

# **Yarrow Creek Farms** *Black Angus*

Dennis was my ride to the 1997 Red Roundup where we met. After helping Dennis in the sorting pen over the following years, the calving barn and processing, in the spring of 2010, I decided to join him with BLACK's, hence "Yarrow Creek Farm Black Angus" division began, and the blended Yarrow Creek Farm and Ranch came to be. My 1st investment was 20 heifers, progeny of Dams from the 2010 KFC Dispersal. We then secured females from Johnson Livestock Dispersal and the U2 Ranch Dispersal with numerous Select sales to give you this product in the catalog. Over the years Dennis and I have had some healthy discussions and tough disagreements on sorting and selecting. We look back and see how much we have grown and learned to appreciate each other's opinion. Experiencing our 3rd year of drought in 2023, the decision was made to market 35 black cows & keep the reds. (2 inches in 2023, 15.5 inches in 2024). I have total faith that you will like the blacks you buy today as much as I have liked them.  
They are a nice set of cows.

Our cows are very friendly. We usually just call them & they will come to us & will follow us anywhere.

-3.3	33	72	17	13.0	12.0		75	832

An impressive calving ease Black Angus herd sire that walked for us. Known as a perfect birth weight specimen maker, (AVG 79 lbs on 64 calves) and super growth (Prime example: Lot 240A - Bull 13M born at 90 lbs and weaned at 884 lbs). Unmatched body mass and rib shape are rarely seen in a top ranking proven calving ease sire. Maternal lineage shows many generations of high fertility, strong footed and PERFECT

udder females. Colossal has CE Top 2% and BW Top 1%. You now have excellent genetics you want to save all the calves from. Pictured is his exceptional phenotype Peak Dot Cedar 417C dam who is a donor female. If you have time, Google: Musgrave 316 Colossal 137. He was born in 2018 and originally purchased by Peak Dot and Semex. By 2018 he was one of the most sought-after bulls of the season. He has 1286 progeny in Canada alone. I have a large amount of literature, and all the reviews and pictures I could get my hands. I purchased my Colossal 806G in spring of 2020, he is very similar to his dad and has a quiet - get-er-done personality. Guess I like him hey!! We have semen selling on him.

A very exciting herd sire Belvin Highmore 0330H. Exciting as well buying him in March of 2022 in partnership with Semex. Very few bulls can combine his phenotype and genotype. 0330 was a soggy made bull with loads of rib shape, hair and attractive look. Now look at his EPD profile. You now have excellent calving ease, milk and

performance and carcass merit with WW and YW and MARBLING all in the top 10% of the breed. His present numbers are CE+3, BW +1.1, WW +76, YW +128, Claw +0.49, Angle +0.41, Marbling +1.26, REA +0.76, Milk +29. Beat that. Dam 3'17 is a donor female for Belvin Angus with embryos across Canada and Australia. She is backed by the prolific Black Angel cow family that needs no introduction. Unfortunately, we lost Highmore in the fall of 2023. His progeny in this sale: Purple Bred Heifer Lot 16 in REDS - LAS 45L, my calves selling: Lot 221A Heifer calf YCF 4M, Lot 227A bull calf YCF 5M, Lot 217A Heifer calf YCF 6M, Lot 237A Heifer calf YCF 31M. We have semen selling on him.

Paycheck was a work horse. We found him always breeding in the pasture. Lots of nice calves from him too. He kept his CE at +5 and his feet were excellent and his milk is +35. He was kind of a roly-polly bull. From the infamous HF Portrayal 67H sire and his Shiefelbein Showman 338 grand sire, Paycheck was stout and thick and a beautiful deep and wide rump. The kind I like. Out of a 2-year-old Alcatraz mother Bar E-L Naomi 57H, he was born at 78 lbs and grew fast to 1337 lbs 365-day weight. He was mainly used on heifers and 1st calvers here because he had a nice smooth shoulder, but he also holds a growth EPF of +104. Perfect for heifers and nice to have around.

I remember liking Mindbender 141D way back in 2018 when he was an up-and-coming STAR in the Black industry. He sold for \$38,000 ½ interest to the Brian McCarthy family-Spring Creek. Mindbender had superior female making parents, HF Tibbie 93U and S. Summit 956, Robin at Bar-H did his homework. I was happy to buy semen on him from Bar-H's Spring sale in March of 2023. Nice even moderate birth weight calves. After 8 years he stands on a great set of feet and is very low maintenance. His greatest contribution is that of his females, stout made, soft in kind and genuinely milk with great udders and teat scores. He carries a +8 calving ease, a +117 YW Top 15%, Scrotal Circumference Top 10% and a +31 Milk Top 4%. I still really like him. My calves selling: Lot 241A Male YCF 2M & Lot 238A Female YCF 10M. I have 4 straws of semen to sell on him.

What a beautiful bull!! In 2023 he won 8 shows in Canada alone. Black Grand Champion Bull in the prestigious Canadian Western Agribition. We were very happy to acquire semen on him for our spring breeding of 2024, thank you Jayden & Jaxon Payne (Greenwood) and Ter Ron and family. The original MVF Tibbie 16F in 1996 was Scott and Orcyia Anderson from Mountain View Farms. The perfect picture RRD Tibbie 28Z

dam of JJP 47J has impressive EPD's today even though she is 12 years old. Now about U-2 Coalition 206C. We watched with him overtime and were anxious to bring him into our program. It is hard to find a good female making sire that is timeless, and such is said about Coalition. Do look at his numbers. He maintains a history making set and at 9 years old still has sale topping sons at very elite sales in North America. Add on his fertile and feminine \$140,000 U-2 Erelite 109Z mother. With this combination of dam and sire you arrive at the Greenwood Four Mile 47J bull. He will have GREAT progeny on the ground for you next year.

The Peak Dot entire family and all the bulls I have bought over the years have both been outstanding to know and great to work with. Showing him off, Peak Dot 146L is a big performance bull. He walked our pasture this spring with great mobility and kept his thickness and muscle and his good feet. Owned by Peak Dot, his sire Gable 311 is a true breeders bull with flawless EPD's, stunning to look at with a big thick butt and he is an outcross pedigree. (426 Progeny in Canada and only 3 years old). To date he

has 14 Top 1-10% in EPD's profile (+161YW-WOW). Retaining females is important these years. Gable 146L will follow right in his sire's footsteps to produce you some lovely progeny. He holds a Top 1% in WW at +85 and a Top 1% in YW at +145, carcass weight and REA. He is ranked Top 1% EPD in heifer pregnancy and a +366\$ CBI. 146L will get after it. Dam, Duchess 129G, has a neat well-attached udder with small teat size and fertile, having 4 calves in 4 calving years. Very nice dam and grand dam Duchess 155Y in his profile. This Gable bull is phenotypically very nice to look at. The 4th bull in the ring and the 2nd highest Gable bull sold that day. Great profile to buy from. He now lives in Athabasca at Big Coulee Angus.

YCF 78L was a very nice bull for us to keep and use for pasture breeding this spring. Sired by the amazing international bull Ellingson Profound 8155 (636 Progeny in Canada), Leary 78L kept his nice EPD profile, a +3 CE and a Top 8% WW of +71 and a Top 8% YW of +125. Having nice growth EPD's we used him on cows. Helping him with calving ease of +11 is his powerhouse

Dam U-2 551G who just done a fantastic job here at Yarrow Creek. All her calves were unassisted and grew up fast. 78L had a sale day weight of 1404 lbs. A reliable bull that will produce nice calves. Owned with Goldridge Colony.

This spring we were looking for a consistent heifer bull and easily chose this Crawford Guarantee son. A spread bull, Crawford Guarantee has all the important 6 traits in the Top 10%. Impressive. Knowing his EPD profile and viewing 3536L on sale day, it was easy to select this agile "next level" rascal. Sale day weight of 1572# and a 41 cm Scrotal. +6 CE, +132 YW, great score on Claw and Angle and a +31 Milk. He is backed by 4 generations of donor cows including THE infamous U2 Erelite 109Z grand dam. With that said we must now talk about and look at the dam, U2Q Erelite 6H. She is so classy and perfect. With incredible length, softness and unmatched presence, she is beyond compare for teat spacing and size and udder attachment. Cole at U2Q comments that Erelite 6H is the very best cow they have ever raised. The mating is exemplary to Guarantee, and he will be undeniably irresistible for you come sale day.

The grand sire Ellingson Profound 8155 has 636 progeny and remains very popular. Back in 2011, on my 1st set of heifers bred, I chose SAV Copyright 0194 as my A.I. sire and bred him to the impressive KFC 1313Y dam. That combination produced the YCF Wrangler 304A sire that Dennis really likes still today. The U2 Miss Morrison 550E (Lot 266) dam remains a main stay here at Yarrow Creek and we have done very well with all her 6 progeny over the years. This female has a growth YW EPD of +103. A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q GUARANTEE 3536L. DUE FEB.

**DAM**

This girl carries that old Aberdeen head and is my style of female. Purchased as a "best" heifer calf from the Reid Dispersal, she has not disappointed. Calving ease, milk and a good yearling weight EPDs. Her sire SAV Rainfall 6846 has "1936" progeny to date. Bull calves averaging 80# and Heifer Calves averaging 74#.

A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q. GUARANTEE 3536L. SAFE TO A.I. DATE. DUE JAN 19.

It is nice to see some SAV Thrive 5054 still at work. He was a thick deep herd bull that I used for A.I. and kept the YCF Fiord 29F bull. The older Reid 4A granddam was nicely balanced and deep and thick too. Sire of this calf, Janssen Rainmaker, is also from the Rainfall progeny that Alta Genetics carried as an A.I. sire. Nice block of a calf with good calving ease (+7) and YW (+120 to +118) and Milk (+30 to +29).

A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q. GUARANTEE 3536L. DUE MARCH.

SIRE

A real treat here. 14L and 15L are twins from the favorite JLMB 491G dam (Lot 261) who is a SAV President daughter (Resident has 944 Progeny). They both weighed 74# at birth and just grew like weeds (WW 660#AVG). Included is the mix is my Colossal revealing CE of +8.5, YW of +100 and great feet and udder (Milk+22). Treat yourself.

A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q GUARANTEE 3536L. SAFE TO A.I. DATE. DUE JAN 19.

DAM

A beautifully made Rainmaker daughter that has tons of capacity (YW+112) and a super nice front. Her calves will have growth ability. Another JL Lady Feature dam (Lot 246) that has earned a 105 WR on her 3 calves. She does a wonderful job; these are the types of cows we all need more of. Keeps her head down and brings home a calf every fall.

A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q GUARANTEE 3536L. SAFE TO A.I. DATE. DUE JAN 19.

DAM

A nice fronted Colossal daughter with extra muscle. Top 1% in BW and Top 6% in CE. Out of a big bodied 1875F super maternal cow maker. With an ideal body type, fleshing ability and a beautiful udder in the making, YCF 64L is as good as it gets.

This CRUSHMAID bred heifer is worth looking at. True to the Aberdeen Angus phenotype, deep and soggy and feminine. She pictured just like her dam JLMB 271G (Lot 258 Feature Cow) when we bought her at Johnson Livestock. Add the Highmore sire, a unique spread bull with a 126 YW, a 1.29 marbling EPD (Top 1% of the breed), and a +29 Milk.

Look at all the greats in her profile: Net Worth, Black Angel, Soo Line Motive 9016, HF Kodiak 5R, Basin Payweight, Poss Maverick, Final Answer, Conneally Consensus, Geis Maximum. Ooh lala, can't go wrong here.

A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q GUARANTEE 3536L. DUE MARCH.

An outstanding Sitz Resilient daughter that is very attractive and easy fleshing. Beauty 106L boasts a 134 YW and +24 Milk EPD. This girl's calves have the ability for growth. To date Sitz Resilient 10208 has 383 progeny and keeps an EPD YW of +136 and is very popular in the USA. Dam is a Feature cow from the Remitall Program, Lot 244.

In 2012 Dennis and I were lucky to see Jindra Double Vision at stud in Billings. He was phenomenal all the way around, even his feet. We chose to A. I. him to Lady Lawn 205Z dam resulting in 87K being just as nice as her dam. Some Ellingson Homegrown in the mix here too. Did she raise a nice heifer calf - next!! A.I. APRIL 12 TO GREENWOOD FOUR MILE 47J. EXPOSED APRIL 15 TO JUNE 20 TO U2Q GUARANTEE 3536L. SAFE TO A.I. DATE. DUE JAN 19.

The U2 team has been very good to us. Their cows seem to last a long time and have fit in with our program very nicely. A testimonial of this cow would be to look at Lot 202, a Feature Bred Heifer. An absolute gem of a cow. Again, the Coleman genetics and especially the Grand Dam Coleman Donna 714 helps make this dam who she is today. Impressive EPD profile and a true Angus phenotype.

EXPOSED APRIL 15 TO JUNE 20 TO YCF LEARY 2378L. DUE FEB.

-1.2	56	1.9	28	13.0	11.0	76	624	

A wedgy style Cajun female with great udder quality and a fabulous EPD record. Where do we start with her EPD's, 5 categories in the TOP 10%: CE+13, BW -1.2, YW +109, Claw +0.53, Angle +0.50 MCE +11, Milk +28. Along the way she has kept a YW ratio of 100 and a Life ratio of 100, so she has growth ability built in with longevity. On the sire side, Werner Flat Top 4136, in his lifetime (474 progeny), produced very solid, easy to calve progeny with growth. He carries a +17 CE and a +112 YW, perfect claw and angle on his feet and a milk score of +35. Honestly, how can you beat that. His females always were broody and thick. Thank you, Colin and Marilyn, for the beautiful females we have purchased over the years. Lot 223 Feature Daughter YCR 01K. EXPOSED APRIL 15 TO JUNE 20 TO PEAKDOT GABLE 146L. DUE MID-LATE JAN.

3.4	62	111	27	3.0	7.0	98	758		

Genetics is so much fun to follow. Bar E-L Natural Law 52Y has 650 calves, PM Executive

Decision 5'17 has 427. Popular Sires, Executive 132M is very appealing stock bull with added muscle an impressive Angus look. +3 CE, +111 YW, +27 Milk. Executive will get after it and has a bright future ahead.

I used Ellingson Homegrown 6035 as an A.I. sire in 2015. He offers a solid maternal-calving ease option with outcross potential for any future breeding. He has kept his standout CE and YW and Milk scores. An added bonus, Homegrown offers very solid marbling, ribeye and \$ back (CBI) to those who select him. Like her mother Cajun 10E, Fancy 16G has extra capacity, yet maintains that softness and is right sized, she does her job well.

EXPOSED APRIL 15 TO JUNE 20 TO YCF LEARY 2378L. DUE FEB.

Lots 262, 263 & 264. 3 peas in a pod-not 2. These 3 seem to have stuck together all these 6 years. YCF 2F is a direct daughter of Baldridge Download 2013, that I chose for A.I. in spring of 2020. Very easy fleshing and thick and solid and a +10 CE front. He was an easy pick based on his true Aberdeen Angus looks and his EPD profile. (Scrotal circumference of 39.25, marbling of +1.16). A tank on the maternal side (1632D and 185Z). A +10 CE, 2F is a sweetheart to me.

A sweet made Paycheck heifer that reveals that nice thick rump. All these heifers seemed to have exploded since they went to grass, and this little miss Baros Star is no exception. Star has kept her nice smooth front but has just blossomed. Lots of potential in this sweetie.

A replica of her mother KFC 1315Y who was probably my BEST KFC cow, Dennis sure thought so. Anne 12E easily gets the job done every year and she looks young. Added performance, BW ratio of 102, YW ratio of 120, Life ratio of 105. A compliment to a calving ease sire. She raises complete thick calves as you can see.

**EXPOSED APRIL 15 TO JUNE 20 TO PEAKDOT GABLE 146L. DUE MARCH.**

GRANDDAM

Marching right along in the footsteps of her mom, I have high expectations for this beauty of a heifer. Backed by some greats, Anne 138M has all the credentials for a foundation type female that will not disappoint. Check her out sale day.

Packed with power, YCF Pride 17113E is the herd building kind. She comes by her phenotype honestly, Whiskey Jack 71C was thick and deep, Pride 1311Y had that perfect tidy udder and feminine features that I really liked. A pasture favorite that holds a CE of +8, YW ratio of 119. Tremendous Cow Family here, Lot 263 a Feature daughter and Lot 234 another daughter. Many granddaughters are in the sale.

EXPOSED APRIL 15 TO JUNE 20 TO PEAKDOT GABLE 146L. DUE MARCH.

I saw this burly guy in the pasture today (Oct 12) and thought, He Looks Pretty Good!! He acquired the depth and thickness from the Valley Blossom sire - Executive 706K and he came by it honestly from PM Executive Decision and BAR E-L Natural Law. Based on his mom he will be a knockout.

As you can see 551G is a tank of a cow with a beautiful body from any place. A spread dam with +11 CE and +86 YW. She came up open so that was a tough one. 139M, easy to spot anywhere, a bull calf that has stretch and volume, throwing that nice hip just like ALL his paternal progeny. Don't overlook the last animal in the catalogue.
